MCGRAW-HILL NURSE’S DICTIONARY, FOURTH EDITION
U Panda

_A comprehensive, well-illustrated dictionary of key nursing terms, definitions, and abbreviations_

Featuring more than 250 full-color illustrations, this pocket-sized dictionary allows readers to quickly and easily look up important nursing-related words and phrases. Carefully updated to include the latest terms, the content has been physician-reviewed to assure the most accurate coverage possible.

Along with clear, concise definitions, the fourth edition also includes 24 valuable appendices such as abbreviations used in prescriptions, food sources of vitamins, centigrade and fahrenheit scales, and normal values in urinalysis.

- Market: Practicing nurses (3 million/USA), nursing students (300,000/USA)
- Focuses on the most commonly used words and phrases
- More than 250 four-color illustrations -- most other pocket nursing dictionaries do not have any illustrations
- NEW TO THIS EDITION: 250 new entries; new appendices, including administration of medicine and normal hematological values; 65 new illustrations

UN Panda, MD (New Delhi, India), Senior Physician, New Delhi, India.

PAIN MEDICINE AND MANAGEMENT: JUST THE FACTS, 2E
Peter Staats, Mark Wallace

A concise, high-yield review of pain medicine and management

This succinct, yet comprehensive review of pain medicine is the perfect tool to prepare for certification, recertification, CME – or for use as a clinical refresher. Featuring the insights of the world’s leading authorities, its highly efficient presentation conveniently condenses and simplifies only the most important, must-know material for maximum yield and comprehension.

The content is carefully limited to the essential facts necessary for assessment and treatment of common pain conditions and presentations. Following a time-saving bulleted outline format, all major considerations of pain medicine are presented, including patient assessment, pharmacological therapy, acute pain states, and chronic pain.

- Market: Anesthesiologists (35,000), nurse anesthesiologists (40,000), neurologists (18,000/worldwide), psychiatrists (80,000/worldwide)
- NEW two-color design
- This edition is highlighted by increased number of algorithms

Mark S. Wallace, MD (San Diego, CA) Professor of Clinical Anesthesiology, Chair, Division of Pain Medicine, University of California–San Diego. Peter S. Staats, MD (Shrewsbury, NJ) is the former Director of Pain Medicine at Johns Hopkins.
OBSTETRIC ANESTHESIA

Alan Santos

The perfect primer and review of anesthetic management of obstetric patients

Obstetric Anesthesia is written to be a practical manual for residents during their rotations in obstetric anesthesia and as a useful review and go-to manual for clinicians who only occasionally practice obstetric anesthesia and are in need of an authoritative brush-up.

Written by the past president of the Society for Obstetric Anesthesia, the book covers the fundamentals of the topic in a quick, concise, and highly clinical manner. There are numerous tables and bulleted lists, and text boxes highlight key issues such as common co-existing diseases and conditions that may affect anesthetic management. For review purposes, key facts are presented in a quick-reference appendix. Obstetric Anesthesia includes the most up-to-date practice guidelines and is an outstanding review for board certification and recertification.

- Market: Anesthesia residents (5,000/year), anesthesiologists (35,000), nurse anesthetists (40,000)
- Includes the latest guidelines from the American Society of Anesthesiologists
- Practical, clinically focuses coverage, not academic or theoretical

Alan Santos, MD (New York, NY) Chairman, Department of Anesthesiology, St. Luke's-Roosevelt Hospital, Columbia University.

LANGE RADIOGRAPHY REVIEW FLASHCARDS
D.A. Saia

A fun, fast, and effective way to prepare for the ARRT Radiography Examination

Based on content from Dorothy Saia’s market-leading radiography exam review books, these flashcards provide students with a high-yield resource to familiarize themselves with the exam’s most challenging topics, formulas, and terms. These flashcards feature a variety of question types, including key term definitions, anatomy identification, radiographic image interpretation, problem solving, short answer, and fill in the blanks. The cards cover important, frequently tested topics such as radiation physics, anatomy, positioning, pathology, image processing, medical emergencies, image artifacts, and infection control. These cards enhance any study method and are great for study on-the-go or as brush up just before the exam.

- Market: 16,500 radiography students
- 200 cards per set
- Questions cover all major topics found on the ARRT exam
- Helps students concentrate on their weaknesses during exam review

D. A. Saia, MA, RT(R),(M) (Stamford, CT), is Director, Radiography Program, The Stamford Hospital, Stamford Connecticut.
